

Environmental Field Technician- Southern Saskatchewan

Qualifications

Arletta Environmental Consulting Inc. is seeking a contract Environmental Field Technician to aid us in providing service to our clients with assets in and around Southern Saskatchewan. The position will focus mainly on managing and documenting client remediation and reclamation field programs as well as directing spill response activities when required. This role is suited to motivated enthusiastic individuals with a strong field and/or environmental construction background. The position will stay open until a suitable candidate is found.

The successful candidate will:

- Possess a certificate, diploma or degree from a recognized college or university.
- Have 5+ Years experience in Land Reclamation, Remediation and/or Spill Response on both Private & Public Lands in Western Canada.
- Have working knowledge of the Oil & Gas Regulatory and Reclamation Process as it pertains to Pre-construction Site Assessments, Mitigation Plans, Phase I & II programs, Groundwater Monitoring and Reclamation Certificate Applications.
- Be proficient with vegetation identification and soil classification.
- Be competent with the field level management of remediation, reclamation & spill response.
- Sufficient experience and competency to plan and budget for remediation and reclamation projects.
- Be self-motivated and detail orientated with strong communication and documentation skills.
- Have experience with stakeholder engagement and mediation.
- Possess a 4WD vehicle, valid driver's license and a clean driving abstract.
- Be willing to work flexible hours as required.
- Be willing to work as a team in order to accomplish set goals.

Job Duties

- Create a scope of work and budget, schedule and manage environmental remediation and reclamation projects for clients.
- Conduct field work related to spill response, environmental monitoring, remediation and reclamation programs.
- Track and manage project costs and timelines.
- Conduct field work related to spill response, environmental monitoring, remediation and reclamation programs.
- Ensure compliance with all safety regulations and SOPs
- Stay current on environmental legislation and regulatory updates
- Participate in the ongoing improvement of company policies, procedures and field practices.

Additional Information

Headquartered in Calgary Alberta, Arletta Environmental Consulting Inc. provides environmental management and assessment solutions to oil & gas, commercial, industrial, public and private sector clientele throughout Western Canada. With broad industry knowledge and experience, Arletta provides advanced insight and comprehensive understanding into each client's unique situation.

Services offered by Arletta include: Environmental management services including program design, liability management, environmental audits, Phase I & Phase II Environmental Site Assessments, characterization and remediation of contaminated sites, groundwater monitoring, spill response, pre-disturbance assessments, decommissioning and reclamation of well sites and facilities, compliance monitoring, risk assessment, and training.

Arletta allows for a high degree of work hour flexibility, encourages continuing professional development and provides increasing responsibility, project diversity, and industry training. Salary for this position is competitive and commensurate with education and experience.
