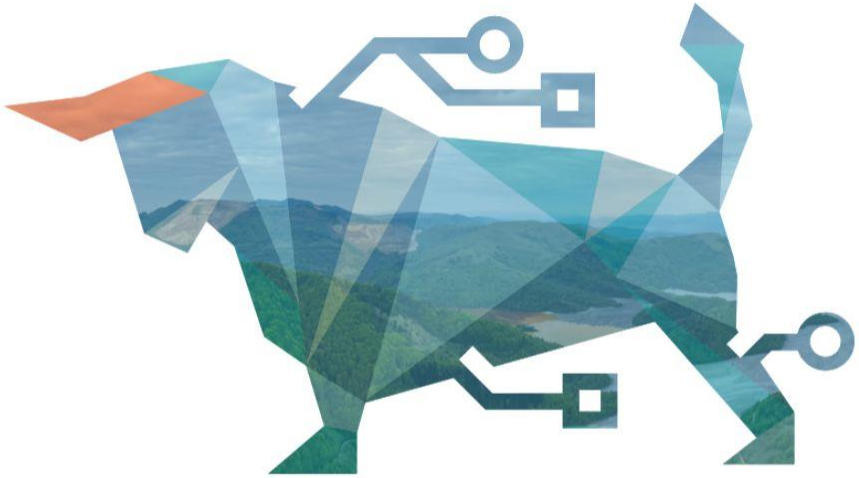
Too Much Information

By Vincent Lam



A little story about me

- I live in Vancouver, BC.
- I have a beautiful wife, and two adorable kids who believe Santa is real.
- I spend time on things that stimulate my brain, such as playing Exploding Kittens.
- I also write code, at Google.
- I am now working with some awesome people to disrupt an industry.

Too much data. Too many systems.

made a comment on task Check the latest shp and kmls:
Oh darn I think I deleted the access road. It all looks really good now. The EM came in really nicely!!
Jane Morrison 02/21/2020
made a comment on task Connect and label blue line trace:
Can you just hide it? As Mark pointed out, it causes the viewer to wonder what it represents. I don't think it is useful for the end user.
