Project

Differences between Rewilding and Ecological Reconciliation and where these names come from.

*How to:*

*Use Boreal Forest  
Trees for Medicine*

**True reconciliation is repairing the land that should have never been damaged in the first place**

**– Dustin Twin**

Project Forest

## Swan River First Nations Pilot Program

# Goals of the Project

1. Traditional Food
2. Traditional Land Use Opportunities
3. Share The Knowledge
4. Leverage Corporate Funding  
with Federal 2 Billion Tree Program

## Ecological Reconciliation

### The Re-introduction of Traditional Plants, Foods and Spaces to Swan River First Nation

Dustin Twin of Swan River Nation says it best, “Success to me means taking my grandkids and great grandkids to the forest we’re planting with Project Forest. We will walk on a trail, sit with our ancestors’ spirits, and pick berries. It’s a feeling of security, of knowing my family can take care of themselves. I love that the people at Project Forest are willing to do things that will benefit future generations.”
